

2. $\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$

7/10/94

Product Management Im-

Stakeholder?

Stakeholder is a party that has an interest in a comp & can either affect or be affected by the business.

Stakeholder

Engage (or) Management
Engagement

Dimensions of Negotiation.

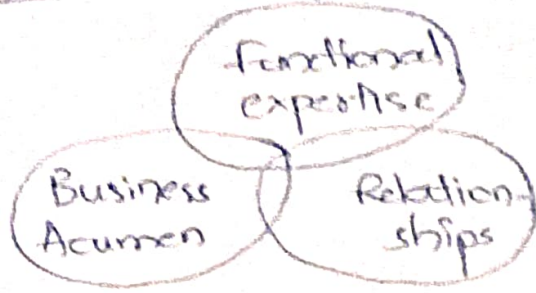

- Scope
- Priorities
- Responsibilities
- Process
- Timeline
- Budget

Leadership:

Inspire Teams to
Take Risks &
Create Value.

To effectively lead :

03/ Aug

Relationship Building Requires:

- Authenticity
- Self awareness
- Passion

When you join a New team?

- How do you identify External stakeholders?

Agile?

- Is a mindset.
- Ability to Adapt to change

Essence of Agile:

- Ability to Quickly & Effectively respond to change.

LEAN:

- a way of thinking abt Creating needed value c fewer reserces & less waste

Essence of lean - minimize waste.

1. kind of changes we need to respond

- structural changes
- requirement
- delivery timeline
- cultural
- Interpersonal dynamics
- Technological changes
- Prod vision changes
- Budget, scope, timeline change
- Market change
- Regulation change.

How will you identify such changes?

- by discussing 2 clients / prod owner
- townhall meetings
- retrospective
- active listening & using fb loops.
- talking to cust every iteratn meeting.
- weekly calls 2 tech support
- Increased trust & reduced conflict
- live fb from clients / stakeholders
- better collaboratn in team?

Case study:

ProjTech - a SaaS Comp developed their signup flow from (3 fields) to 5 fields & noticed 40% drop-off compared to signup 2 3 fields.

60% users who entered email not proceeding to next step.

Next steps:

1. how do you decide next steps?
2. Who are the key stks you would discuss 2?
3. what could be some of their perspectives?

How will you know if your response is effective?

- live fb from clients / stakeholders
- survey from cust / fb / 3rd party assessment / industry benchmark & audit
- better collab in team

— 9:30

Key stks:

- UX — (maybe new fields adding confusion)
- Tech — (could there be a tech issue)
- Marketing — (are we targeting wrong audience)
- cust support (Are users reaching out 2 Comp)

More info on Possibles. (ppt-2)

Data helps

- Internal
- External
- News - Industry / General
- Data tells whats happening, stks helps you understand why
- Cross-functional collab ensures decisions grounded in data & Insights.

1. No Decision

(Ignoring & moving ahead)

No Buy In

Pros

- avoid rushing into a poor choice & incomplete info.
- Prevents resistance or backlash from stks who are not aligned.
- Keeps options open for future opps (or) better timing.
- leads to stagnating progress & Innovation.
- Can create frustrating teams waiting for direction.
- Risks becoming a default decision, where inertia results in missed opportunities.

Pros

- ensures momentum
- can work in hierarchical env where d.m's have final say.
- may yield quick wins if decision proves success despite lack of support.
- high risk resistance
- lack of
- passive
- teams n execute r
- difficult to

when its justified

- Critical gap in info
- further alignment efforts likely to succeed.
- External factors (market condts, budget cycles) suggest waiting is more beneficial.

When Justified?

- urgent situation where delaying cause major
- data strongly supports de even if stks disagree

Causes:

- Executive Pressures / dead
- urgency over Consensus
- Siloed DM.
- Overconfidence in Author
- Lack of stk engagement

No Decision: Causes:

- Problem may not be clear
- focus is on all problems not possibilities
- Ppl not listening to each other
- Risk aversion / fear of failure
- too many decision makers.

3. Decision & Buy in:

- everyone is committed

Pros

Cons

- Smoother implementation
- Committed stks
- reduce friction
- enhances collab
- ↑ likelihood of long-term success
- takes time
- aligning stks
- can slow down execution
- can lead to compromises that dilute original decision's impact

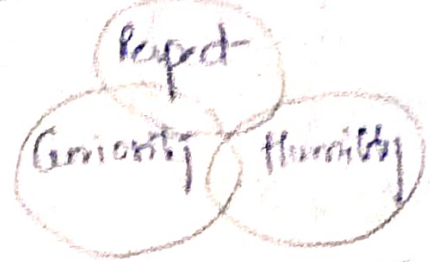

When Justified?

- for strategic, long-term initiatives
- change in mindset is needed for success
- when decision & req cross-functional execution & dependencies.

Causes:

- strong stk engagement
- clear commⁿ of value
- Collaborative culture
- concerns are listened to & addressed proactively
- data driven Justification
- Trust in Leadership

Mindset:

10-Aug

Building Trust:

3 el of trust

- Expertise
- Consistency (actions & words)
- Relationships (did we like each other)

Expertise:

- use good judgement when making decisions
- others trust their ideas & seek after their opinions
- their knowledge & expertise make an imp contribution to achieving results
- can anticipate & respond quickly to problems
- Consistency
- walk the talk
- honor commitments & keep promises
- a role model & sets good ex.
- are willing to go above & beyond what needs to be done

Relationships:

- stay in touch on issues & concerns of others
- balance results & concerns for others

- Generate Cooperation w others
- Resolve conflict w others
- Give honest fb in helpful way.

Time Management (1/10)

Eisenhower/Time Management Matrix.

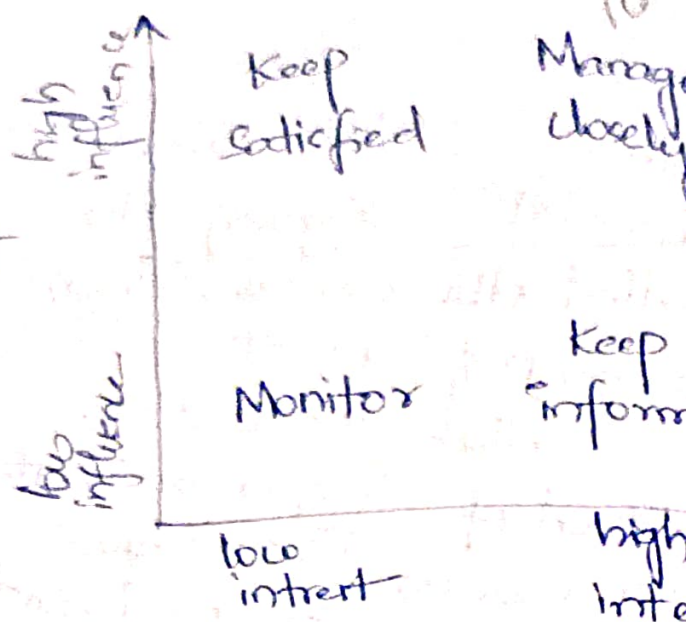

Q1 (Gists)	imp	Q2 Growth
Urgent		Not Urgent
Q3 (Distract)	not imp	Q4 Waste

- Q1 - escalates / prod issues
- Q2 - Learning / Planning / Recreation
- Q3 - Some else's Q1
- Q4 - meaningless charts / too much of anything.

Qtr's to Ponder

- where are you spending most time?
- are you happy w the way you spend?
- are you investing sufficient but not urgent tasks.
 - Building relationships
 - Plans to reduce Q1/Q2 in future
- what changes do you want to start making to way you prioritize?

Mapping stks

CS - GT needs to upgrade to SNCB... which would be expensive ^{gold} postpone UK rail 1 year.

↑ inf	Derise Greg	Richard Ky Mo
	Keep Satisfied	Manage closely
↓ inf		
	Monitor	Keep Not Informed

↓ int

↑ int

- maintain relationship all stks

- based on situatⁿ ad levels will go up &

Activity:

21-Aug

Same situatⁿ, but
changed behaviour/commⁿ.
Why?
What changed?

The Person
Their expectations
Their concerns.
Understand how Personals
Feel Think Do.

eg: Name - role. Personals
motivations
Goals Frustrations
-Everyday activities Fears

Age, geography, behaviour

--- plays role in -
how ppl think.

eg: Deepa - Director PGP @ XYZ

Motivation - Org Drivers

Why Org cares abt a gal:

1. Revenue Growth: sales leader
motivated by hitting
Quarterly num.

2. Cost Efficiency: Operations
head wants fewer process
inefficiencies.

3. Compliance & Risk -
legal/Compliance officer
focused on avoiding fines

4. Innovation & Growth - Prod
head wants market diff.

5. Cust Satisfactn - Support
lead motivated by reducing
churn/NPS improvement.

Motivatⁿ - Personal Drivers

1. Career Growth

(will this proj make me
Visible to leadership?)

2. Recognition/Status -

(will my team be seen as
critical to success?)

3. Workload/Effort -

(will this make my life easier
or harder?)

4. Autonomy/Control

(Do I get a say in how this
is done?)

5. Sec/Stability -

(will this change threaten
my role?)

6. Pride/Values -

(Does this align w what
i believe in?)

Personal Motivatⁿ: SCARF

Status: desire for recognition/respect

Certainty: need for predictability

Autonomy: need for control

Relatedness: desire to belong/trust

Fairness: need for just treatment

Threat:

Fight (or) flight.

Situation:

SNCB & GT Case-study
[refer PPT]

Maruzio - CRM Brussels

Personal

meet motiv

- cust retentⁿ
& growth

- Career growth

Goals

- ↑ usage & interact

- Ensure cust satisfactⁿ

- Low Turn around
Time (TAT)

Everyday acti

- review open support
issues

- Commⁿ &

- status updates, issue
status for External
RTs.

Frustratⁿ

- High TAT

fears

- losing cust

- Negative fb

- reductⁿ in
revenue

- Job loss

By Richard Persona.

Business functions

Roles & Expectatⁿs

1. Executives

expectⁿs from Prod.

strategic align -

(how prod u is contribut
to comp larger obj)

Best practices:

- keep details to minimum
unless asked for
- show a +ve attitude
honest but +ve.

Marketing:

Expe from Prod.

- know how to positⁿ
prod cctly: who/why/hw

Best Practices

- Engage & marketing ear
on prod dec.
- tell prod story
- keep informed on
timelines.

Sales:

Exp from Prod

- how can you drive
more sales

Best practices

- show sales how th
helps ↑ sales.

- be responsive & keep them engaged.

Customer Success:

Expect from Prod:

Info to help retain existing cust & ↑ revenue from them.

Best Practices:

- Cust success teams are valuable src for Cust Insights.
- Engage in prod demos
- updated info on prod roadmap, launch dates, features & known Bugs.
- Provide release notes & assist c training & Onboarding.
- Pilot programs.

Don't forget

- Personal Ambitions
- Prior Experiences.

Influence Areas

- Budget
- Timeline
- Scope.

Product Persona as VP

- status / Recognition
- Certainty
- Pride / Values
- Cust/client satisfaction
- Stability

Goals:

- to deliver prod in time
- ensure leaders satisfaction

Frustrations:

- delay in delivering prod

Everyday acti:

- monitoring prod status weekly
- Commⁿ c dev team
- Status updates to clients

Fears:

- losing budget/trust from clients
- Values, Career growth effected
- Job loss
- Recognition

⇒ ShoutOut Activity

Inspiring Teams:

- Cathedral story.

Structure of story

- Catchy Title

- Relatable lead char & Imagery

- Problem/Villain

- Soln.

Be clear abt purpose of story.

Eg: Abhi kya karega?

Dashboard Prototype

- charts on a Dashboard.

Vs.

- Admin Decision Support

- buying out picture is better than showing Dashboard.

My User stories
Provide Context

who? what? why?
who what do why do
wants they want they want
it? want? it?

Transitioning from Engg to PM.

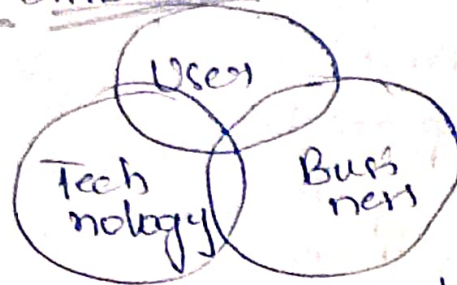

Challenges:

- Comfort Zone

- Engineering efficiency.

Effectiveness over efficiency during initial stage.

Diff Dimensions:

Comfort Zone challenges.

- Technical focus → Users & Buss
- Decision making under uncertain
- Stk Engagement
- Priority management & Context Switching
- Communicate
- Accountability

3/18

Rumsfeld Matrix

Unknown knowns (im good/bad at this but i didn't know this.)	Unknown unknowns
known knowns	known Unknowns (where general)

(i know it, but idk much abt it)

1. Known known.

eg: Amazon logistics.

- cust shd find what they want
 - it shd be ↓ prices
 - fast delivery.
- Amz
basics
in cust
support

2. Known Unknown

eg: House of Cards
(Netflix produced)

they knew what to do,
but dk whether it works
or not.

3. Unknown known.

eg: Nokia & Smartphone
shift

Symbian OS (Nokia OS)

eg: Slack.

we know it somewhere,
but its not surfaced / used
in decision-making.

- we didn't realise we know?

like forgotten / overlooked

4. Unknown unknown.

eg: BlackBerry.

(they were ruling the
world, but didn't know
apple will come & same
ios & disrupt the party).

eg: Govt changing rules

for Dream11, ---

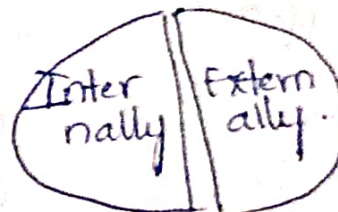

it is known unknown.

Demonitization.

Who can help c unknowns.

- Cust
- Partners
- Suppliers
- Experts
- Regulators

Building Credibility:

Focus: Solve the Problem.

- don't focus on implementing feature.

eg: Aadhar Validation vs DRM

- You'll become a Problem solver
not just an order-taker.

DRM - Digital Rights

Preparing for cust meet

here & Now

Support Issues - support

Usage data - metrics

what's coming - Product

hot topics - cust success.

Future.

where're you going?

what're your big worries?

what're we thinking/planning?

Preparing for partner meet

here & now

open issues
usage / cost data

Future

what are you going?
what're you thinking / planning?
" " " "

What are we going?

What if yk ans?

While i already 're "this"
Perspective, would love to
hear your perspective.

Breakout Room:

NIHITO:

Nothing imp happens
in the ofc.

Geography Limitations?

- its a virtual world.

Travel for Events:

- Can meet so many
cust in 1 trip.

Why Estimate?

(Time, Budget, 1st on Negotiated
Scope)

eg Scenarios:

1. optimize a db query (why)
2. fix a mem leak that crashes server intermittently
3. implement automatic Fe. new feature.
4. migrate from old api to new protocol.
5. Build deployment pipeline to reduce release cycle

Why Estimate?

- Every effort is an Investment

Energy Time Money.

When you Invest.

- maximize ROI

$$\text{Return} = \frac{\text{Estimated benefits}}{\text{Value}}$$

$$\text{Investment} = \text{Estimated cost}$$

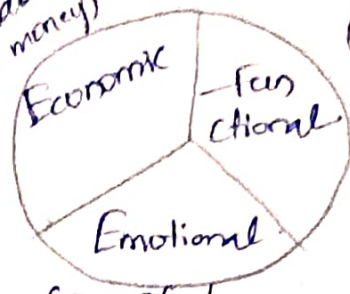

- minimize risk.

3 Key Elements

- How much?
- How Many?
- How Likely?

Value Estimation

(make money, save money)

(Convenience more choice)

(how i feel, how others feel)

eg: slack.

func Value

- ease of cross team collab.
- quick msg across multiple grps.
- faster.
- one stop dest.
- Time & Savings.

Economic

- How much it save?
- avg cost of this time?
- how much would they be willing to pay for this saving.

Reducing MTR.

Raise ticket → find log → Root Cause
3 days.

close ticket ← return job ← issue
0.5 hrs.

- Saving time
- Cust Satisfaction ↑
- ↑ efficiency.

Economic, Emotional.

2 Negative qtn

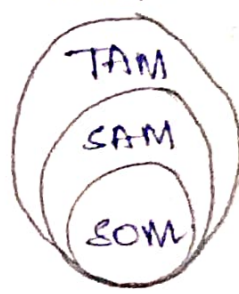

- what's the impact if we don't do this?

SNCR vs UK rail

- if you invest in SNCR what's gain?
- if you don't invest what do you stand to lose?
- if we do SNCR, what will we not do?

How Many?

TAM | SAM | SOM.

total addressable market
serviceable " "
serviceable obtainable "

eg: Hsptl is 2 Beds > 900 to 2500^{hosp}

TAM = 100K hosp (Across country)
SAM = 200 to 2.5K hosp.
SOM = 50 - 200 across a state.

Estimating Potential:

- Audi, BMW, diamond Jewe

Uncertainty.

- factors
- Cust behaviour - historical da
- Market condtns - Market
- Success rate - Expert Opinion
- cost estimates

Probabilistic Model

$$\text{Expected Value} = \sum \left(\begin{array}{l} \text{Prob of outcome X} \\ \text{Value of outcome} \end{array} \right)$$

eg: 40% chance of earning
\$100,000

60% chance of " \$60,000

$$EV = (0.4 \times 100,000) + (0.6 \times \text{~~100,000~~ } 60,000)$$

$$= \$40,000 + \$36,000$$

$$= \$76,000.$$

Scenarios
